

## PLATFORM OVERVIEW

# SIMPLIFY THE COMPLEX

As a leader in performance management integration, Workiva's OneCloud delivers several unique benefits for companies looking to integrate their business-critical applications:

### 1. TRULY CONNECTED PLANNING

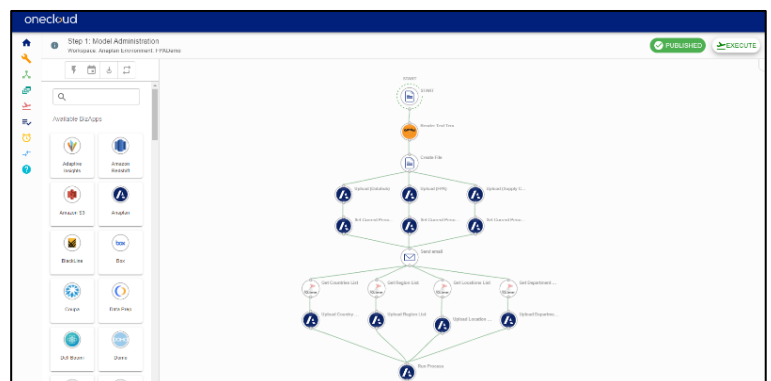

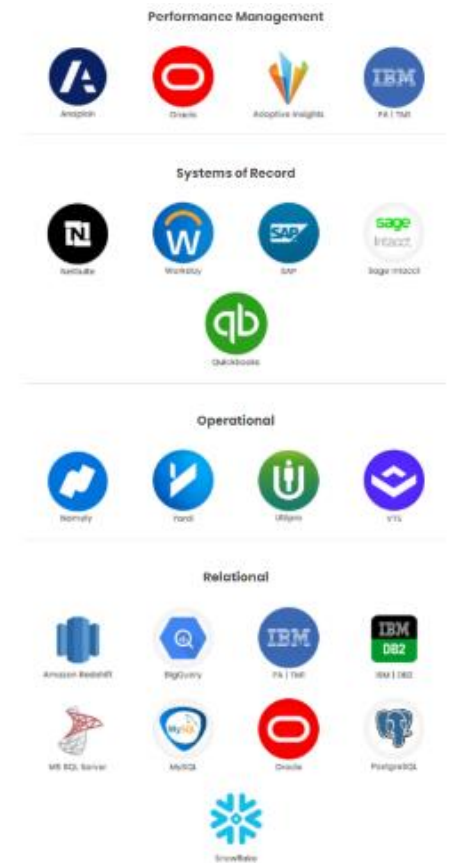

Integration of planning applications with your Enterprise Resource Planning (ERP), Human Capital Management (HCM), Customer Relationship Management (CRM), and reporting systems allows users to build a comprehensive connected planning environment. OneCloud ensures all systems have the same up-to-date data so all business decisions can be made accurately and promptly.

### 2. POWER OF THE PEOPLE

Self-service connectivity, data transformation, and integration process automation allow end-users to execute on-demand business processes in trusted environments like an [Anaplan Dashboard](#), Slack, or Microsoft Teams (coming soon). For system admins, OneCloud empowers users to self-sufficiently build and manage their own integrations and workflows without coding or scripting.

### 3. SINGLE PLATFORM FOR CONNECTIVITY AND TRANSFORMATION

OneCloud offers application integration and data transformation in a single platform, giving users a complete end-to-end integration solution. **OneCloud Integration Studio** provides bi-directional and native connectivity to business-critical applications, such as Anaplan, Oracle EPM, Salesforce, NetSuite, Power BI, Tableau, Snowflake, and Google BigQuery. **OneCloud Data Prep** is a powerful and flexible self-service tool for technical and functional data transformations in an interactive and intuitive interface.

## PLATFORM OVERVIEW

### 4. LOW FRICTION, FAST SETUP

With an extensive library of business functions, users can easily connect to and automate a variety of applications that extend across your business. Real-time planning data is at your fingertips in no time with out-of-the-box integration capabilities for over 60 technologies.

### 5. ANAPLAN TRANSACTIONAL API INTEGRATION

OneCloud has extended the functionality of its Anaplan BizApp (i.e., integration connector) to fully support the new Anaplan Transactional APIs. The new APIs allow Anaplan customers to incorporate more detailed and granular data into their models, and OneCloud accelerates and automates the seamless connectivity between the systems.

### 6. DATA PREP

Data Prep offers a robust data transformation tool for the Anaplan customer base. Here's a recent [press release](#) about Data Prep that includes comments from several customers who use the tool daily and advocate for its integration efficiencies.
