- Practice custom-built Anaplan exercises across different use cases
- Translate conceptual understanding and business requirements to real-world application and design
- Review model hygiene standards to ensure quality and sustainability

Testimonial

- Retail FP&A Analyst -

“

I had no confidence before the training given that I've never interacted with a planning tool before; however, after the training I feel much more confident about being an Anaplan model builder. The training was very effective.

”

Why this training?

Decrease model building ramp up time

Improve model quality as you scale

Empower to think like an architect
